## The Welcome Center TechnologieRegion Karlsruhe is a service of the TechnologieRegion Karlsruhe GmbH

We – the Welcome Center TechnologieRegion Karlsruhe (TRK) – are a central point of contact for companies throughout the region and for international professionals as well as their families.

Our stated goal is to bring regional employers and skilled workers from abroad together. The international professionals are welcome to contact us with questions about arrival and integration. We act as a guide and work closely with many local, regional and international players together.

### Target groups of the Welcome Center TRK

- ▶ **Business** – especially small and medium-sized companies (SMEs), scientific and research institutions, municipalities with a need and interest in international skilled workers or trainees
- ▶ **International professionals** of any profession, industry and their families

**BUSINESSES**

## Top in technology and innovation – benefit from the competencies and synergies of the TechnologieRegion Karlsruhe GmbH

The Karlsruhe TechnologieRegion is one of the strongest economic regions in Europe. We intend to retain and continue to build on this leading position, focusing on the great potential offered by international professionals.

Our region is home to a mix of multinationals, world leading scientific institutions, SMEs and start-ups, along with a well-balanced cross-section of sectors with a high proportion of next-generation technologies. The focus of Technologie-Region Karlsruhe GmbH's work is on the themes of mobility, energy, digitalisation and bioeconomy.

Our region is a growth area and is creating jobs. However, many of these are already difficult to fill: the skilled workers shortage in many sectors has become one of the most urgent challenges facing businesses here. Meeting the demand for skilled professionals is therefore one of TRK GmbH's most important tasks for the future and is an important pillar in its work.
